*IOFM

Intelligent data capture

With a 99%+ accuracy rate, "it's like facial recognition for documents," Jamie Bsales of Buyers Lab says in a review.

Seamless integration

Newly digitized records and extracted data transfer easily into your accounting system and other business applications.

Hands-free document & file sharing

Are you still moving at the speed of paper? Automated file and folder transfers moves invoices fast and securely.

Remote access from anywhere, anytime

Automation enables the uninterrupted remote operation and management of accounts payable departments.

Centralized record handling

Securely collect, manage and store all of your electronic and digitized invoices from multiple locations.

Advanced data security

Safeguard all of your financial records with advanced security protections and redundant data backups.

" Migrating from paper-based AP processes to an electronic system was easy.... We've seen a high level of buy-in at every location. I have even received calls and emails with compliments about how easy it is to use"

- Alberto Centeno, Director of Shared Services,
Commercial Metals Company

" Every time we set up a new invoice or form, PaperVision.com is very consistent in recognizing them, so we no longer have to go back and review if the data is correct"

- Georgia Pelton, Accounts Payable Administrator,
Seafood Producers Cooperative

Getting started with AP automation is easy.
